SUPPORTING ENVIRONMENTAL EDUCATION IN THE CLASSROOM

Interactive Learning through Worm Composting

Looking for ways to engage your students through interactive learning? A classroom worm composter (a.k.a. vermicomposter) is a thrilling way for students to see science concepts illustrated in a real-life setting, and to gain inspiration for language and the arts!

This autumn, EcoSource is offering Peel teachers an engaging professional development opportunity that covers successful strategies to integrate vermicomposting into numerous curriculum areas, allowing the vermicomposter to become a tool for hands-on learning.

Interested teachers can also receive a FREE vermicomposter that includes all necessary supplies and red wiggler worms! In addition, teachers will be given a worm journal, a huge book full of vermicomposting lesson ideas and worksheets, and a manual to make vermicomposting easy!

There is no cost to participate, but spaces are limited. For more information or to register for this unique opportunity, contact Jessica Kukac at jkukac@ecosource.ca or 905-274-6222.

PD Session Details

Date: Tuesday November 29, 2011

Time: 4:15-6:00 - Dinner included!

Location: St. Dunstan Elementary School, 1525 Cuthbert Avenue, Mississauga

Cost: Free!
